PUBLIC SAFETY DEPARTMENT

02/04 - 02/17

- 17 EMERGENCY CALLS
- 14 MEDICAL CALLS
- 7 TRANSPORTS BY MCEMS
- 1 TRANSPORT BY DAUPHIN ISLAND RESCUE
- 3 FIRE CALLS

The Peoples Parade on 2/8 had one medical emergency that required transport off the island by Dauphin island fire rescue's ambulance. Two other very minor medical issues were also treated and released. With only 3 medical issues reported, The Peoples Parade with its large crowd and large number of parading units went very smooth.

The MISS parade only had one very minor medical issue that required no treatment or transport.

PSO McQuade has completed the FEMA class introduction to emergency management . He has spent the last week at the Mobile County Emergency Management Agency. They worked with Federal , state and local agencies to run different emergencies together. This will allow Dauphin Island to build stronger relationships with our emergency partners

Public Safety is assisting Dauphin Island Vol fire Rescue with standing by for prescribed burn at the bird sanctuary

- Moved parking bumpers to Fort for installation.
- Cleared under brush on property next to Public Works.

Mechanic Report

02/02 – 02/15

No report provided.

Thank You

James Stokes

Public Works Superintendent

Town of Dauphin Island – Monthly Project Progress Reports

Moffatt & Nichol - February 12, 2025

210924 – EAST END BEACH & DUNE RESTORATION (NFWF GEBF#76864; NFWF NCRF #76404)

CONSTRUCTION COMPLETE – MONITORING TO CONTINUE IN 2025, 26, 27.

The East End Beach and Dune Restoration Project has completed placing one million cubic yards of sand in the beach template and creating dune restoration features along 1.5 miles of beach. The project extends from East End Public Beach to halfway through DeSoto Landing neighborhood. In front of the Bird Sanctuary to the East End Public Beach and the condos, hummocky dune features have been restored with sand fence. Along Audubon Place neighborhood there is a linear dune with sand fences. Along DeSoto Landing there is an extended beach habitat. 639,000 native plants were planted. Final payment to the contractor will occur in January 2025. There were 13 dune walkovers installed to date to limit disturbance to the new dune feature. Post-construction monitoring will continue for three years. The project is funded by the National Fish and Wildlife Foundation Gulf Environmental Benefit Fund and National Coastal Resilience Fund.

210722 - DAUPHIN ISLAND BEACH RENOURISHMENT (NFWF GEBF #73501 AND GOMESA)

The Town is working with their engineering team to design and permit the full restoration project for the nourishment of the west end of Dauphin Island. NFWF GEBF and GOMESA grants are funding full design and permitting. Modeling and field investigations have been completed. The team has reached 30% design and the permit has been submitted and will take 12-18 months to obtain. The Public Notice for the permit is out for comment. The team is evaluating phasing of the project moving forward to 60% design and 100% design in 2025, as the team pursues project funding. The engineering team and Town of Dauphin Island conducts regular meetings with federal and state partners to share data and update on projects activities. **ADCNR/ADEM will be holding a public meeting March 6th at 6pm at the Community Center for receiving comment on designating a mean high tide line. The Town will be working with individual landholders to obtain construction easements to place sand on private properties throughout 2025 and 2026.**

210722/02 – LINEAR DUNE FEATURE (GOMESA) – **COMPLETE**

FY25 HOMELAND SECURITY EARMARK - PENDING

In an effort to protect infrastructure and Bienville Blvd from sand overwash on the West End, the Town will raise road access points. In essence, the raising of these access points makes a connection with the existing linear dune feature, creating a more contiguous dune barrier. This dune feature is critical for retaining sand on the Gulf-facing beach during typical storm events and for reducing the amount of sand that ends up on Bienville Blvd with costly response. This will work in concert with the recently established Town action encouraging private landholders to elevate their driveways. Funding will be obtained in Quarter 3 of 2025 to extend the GOMESA funded project to other Town crossroads.

EPA BARRIER ISLAND WATER QUALITY AND STORMWATER MANAGEMENT

The Town of Dauphin Island secured a grant from the EPA Community Grant Program to develop a series of engineered wetlands through land acquisition and improvements to capture and absorb stormwater on undeveloped land. All land acquisitions will take place with willing sellers at market value. This project will help to alleviate the drainage problems that currently exist throughout the eastern portion of the Town and to improve the water quality of the surrounding critical waterways. The affected area is comprised of approximately 1.8 square miles. Currently, the drainage in this area consists mostly of driveway culverts and cross drains, connected with open ditches that are tidally influenced since the outfalls empty into
